INDEX OF ABSTRACTS

Bold face figures refer to abstracts, light face figures to pages.

Alveolar types, classification of, (c)**116**-113

Bacteria obtained from mouth, (b)**87**-108

Biological factor in etiology of marginal atrophy, (d)**430**-126

Breath odors, (c)**122**-116

Buccal lesions and dietary deficiencies, (d)**431**-126

Capillary-microscopic studies on paradentotics, (c)**108**-111

"Chamsin" and pyorrhea, (d)**415**-122

Dental cementum, pathology, (a)**200**-107

Dental Infection, (d)**421**-123

Dental study, inhabitants Tristan da Cunha, (c)**120**-115

Diet and dentistry, (d)**427**-125

Difficult dentition an etiologic factor in paradentosis, (d)**428**-125

Diseases of the paradentium, causes of, (d)**412**-121

Experimental dietary deficiencies in monkeys, (c)**125**-117

Experimental dietary deficiencies in monkeys, (c)**124**-117

Factors in saliva correlated with calculus, (c)**123**-116

Focal infection, (c)**107**-110

Food habits of Australian Aborigines, (d)**409**-120

Gingival infection, relation to arthritis, (d)**411**-120

Gingivitis: Its chemical causation and cure, (d)**432**-126

Histo-pathology, relation of, to clinical dentistry, (a)**196**-106

Hypovitaminosis C, (d)**433**-126

Innervation of the gum, (a)**199**-107

Nicotin on vitamin C metabolism, (c)**121**-115

Oral bacteria, control of, (b)**90**-109

Oral bacteriology, (b)**86**-108

Oral flora, variations in, (b)**89**-109

Oral health related to cusp form, (c)**113**-112

Oral mucosa in ovarian disturbances, (c)**112**-112

Paradental conditions of school children, (c)**106**-110

Paradentosis, (c)**118**-114

Paradentosis, (d)**406**-119

Paradentosis, (d)**417**-122

Paradentoses and endocrine glands, (d)**419**-123

Paradentosis, etiological relationship to intestinal bacteria, (d)**424**-124

Paradentosis, factors in production of, (d)**405**-118

Paradentosis, relation of lost function to, (d)**414**-121

Parodontal diseases, (a)**201**-107

Parodontal disease produced experimentally, (c)**115**-113

Parodontal inflammation and dentine absorption, (a)**197**-106

Periodontal condition and certain dietary factors, (d)**426**-125

Periodontal destruction due to loss of molars, (d)**410**-120

Periodontal disease, etiologic factors, (d)**408**-119

Prophylaxis of caries and paradentosis, (d)**423**-124

Pyorrhea alveolaris, allergic disease, (d)**404**-118

Saliva, influence of, upon growth of bacteria, (b)**88**-109

Scurvy, (d)**418**-122

Stomatitis aphthosa, etiology, (d)**407**-119

Stomatitis resulting from oil of cloves, (d)**429**-125

Trauma in an erupting premolar, (d)**416**-122

Traumatic occlusion, (d)**425**-124

Tooth loss in diabetics, (c)**126**-117

Ulcero-membranous stomatitis, (d)**420**-123

Unreplaced tooth, relation to periodontal disease, (d)**422**-123

Vincent's infection, organisms in, (b)**91**-109

Vitamin B_1 and C, metabolic relationship, (c)**109**-111

Vitamin C content of organs, during healing of wounds, (a)**198**-106

Vitamin C deficiency in gingivitis, and paradentosis, (c)**111**-112

Vitamin C dosage, studies on, (c)**127**-117

Vitamin C, histo-chemical studies, (a)**202**-107

Vitamin C in early childhood, (c)**114**-113

Vitamin C, in preserved food? (c)**110**-112

Vitamin C in the etiology of paradentosis, (d)**413**-121

Vitamin C in urologic diseases, (c)**128**-118

Vitamin C pattern in the blood, (c)**129**-118

Vitamin C problem, (c)**117**-114

Vitamin requirement, (c)**119**-115

Vitamin C with a carrier substance in cell, (a)**203**-108
